Subpart R—Kansas

§ 52.869 Identification of plan—Conditional approval.

Elements of the maintenance plan revision to the State Implementation Plan (SIP) submitted by the Governor's designee on May 21, 1998, which address contingency measures for the Kansas City Ozone Maintenance Area are conditionally approved. This includes a commitment to implement the additional reductions as expeditiously as practicable. Full approval of the SIP is conditioned upon receipt of one of the following by June 28, 2000: a request from the Governor of Kansas to require the sale of Federal reformulated gasoline within the Kansas portion of the Kansas City Maintenance Area; adopted regulations implementing the contingency measures identified in the 1992 maintenance plan, i.e., Stage II Vapor Recovery or an Enhanced Inspection and Maintenance Program; or any combination of adopted regulations that will achieve the minimum volatile organic compound reductions (8.4 tons per day) required by the contingency measures identified in the 1992 SIP. In the case of options 2 or 3, upon receipt of regulations implementing these provisions and a request to amend the maintenance plan accordingly, EPA will initiate a rulemaking on this subsequent revision. If the state fails to submit one of the above requirements within the time specified, the conditional approval automatically converts to a disapproval without further regulatory action.
